

100ah power station in China in Angola

Overview

Angola's Caculo-Cabaca Hydropower Station, built by China Gezhouba Group Co., has completed the temporary diversion of the Cuanza River, entering the main construction phase. Screenshot from China Energy's YouTube video. This article was submitted as part of the Global Voices Climate Justice fellowship, which pairs journalists from Sinophone and Global Majority countries to investigate the effects of Chinese development projects abroad. At the construction site of the Quilonga Water Supply Project undertaken by the Power Construction Corporation of China (PowerChina) in eastern Luanda, Angola's capital, workers are busy at their tasks in an orderly fashion. Figueira Kalunga, a safety management technician, moves around the site. The Luachimo hydroelectric power plant in Angola, renovated by China Gezhouba Group Corporation, quadruples its capacity, providing a sustainable solution to growing energy demand. (Xinhua/Wang Guansen) LUANDA, Sept.
