

# 2 MW of solar cells in Venezuela

## Overview

---

According to current regulations, self-generation systems with a capacity of 2 MW or more require authorisation from the MPPEE. Energy transmission must also be carried out exclusively by CORPOELEC. Venezuelan President Nicolas Maduro has unveiled a solar plan to bring new energy to the Venezuelan Andes, a region plagued by power outages. This announcement comes as. Could solar energy help Venezuela power its way out of crisis?

A woman inside her house in Caracas, Venezuela's capital, during a blackout (Image: Luis Morillo / Alamy) For more than a decade, the residents of Zulia have only had electricity around 50% of the time. Food rots and appliances break. Additionally, the Law on Rational and Efficient Use of Energy (LREUE) defines alternative energies as those capable of generating electricity through means other than conventional energy sources, such as hydrocarbons and hydroelectricity. The Venezuela Plan. ergy mix of Venezuela. This tendency is maintained by the significant decrease in the cost of renewables with the support of investment incentives includes solar.
