

2025 Photovoltaic Panels LONGi Solar

Overview

Chinese solar manufacturer Longi unveiled a new PV module with 25.9% efficiency at the 2025 SNEC trade show this week in Shanghai, produced using both low- and high-temperature passivation techniques. Chinese solar module manufacturer Longi unveiled a new solar module this week at the SNEC 2025. At the key node of intergenerational transition of global Photovoltaic (PV) technology, the back contact (BC) cell technology is leading the new-generation PV technology paradigm revolution, becoming the core engine to drive industry cost reduction and efficiency improvement and realize energy. At the recent SNEC 2025 solar expo held June 11-13 in Shanghai, solar powerhouse LONGi made waves with not one, but two groundbreaking efficiency milestones—both setting new global records and being promptly included in the 66th edition of the authoritative Solar Cell Efficiency Tables. This. Solar panel efficiency is the amount of sunlight (solar irradiance) that falls on the surface of a solar panel and is converted into electricity. Due to the many advances in photovoltaic technology over the last decade, the average panel conversion efficiency has increased from 15% to over 24%.

2025 Photovoltaic Panels LONGi Solar

The World's Leading Supplier of Solar PV Solutions

Vertically Integrated Solar PV Value Chain LONGi's technological and manufacturing leadership in solar wafers, cells and modules underscores our commitment to helping accelerate the clean energy ...
