

# 20MWh solar-powered containerized water treatment plant in Zimbabwe

## Overview

---

The solar facility is expected to be completed by the end of Q2 2025, providing a stable power supply for ferrochrome production. These state-of-the-art systems are designed to meet diverse water purification requirements, offering flexibility, scalability, and superior performance. In this comprehensive guide, we explore the benefits, functionalities, and applications of containerised water treatment plants in Zimbabwe. Our containerized water treatment plants, with capacities ranging from 5m<sup>3</sup> to 500m<sup>3</sup>, are designed to provide efficient and reliable water purification for diverse needs. Whether for emergency response, remote sites, or urban installations, our systems ensure access to clean and safe water anywhere. Refinar East Africa is a leading manufacturer of any type of water treatment plant in a containerized version. Resources at scale are needed to provide communities in fragile settings with access to safe water, core to foster climate resilience, say African Development. Resources at scale are needed to provide communities in fragile settings with access to safe water, core to foster climate resilience, the African Development Bank and UNICEF said during the COP27 in Egypt According to a recent report by Oxfam, Hunger in a Heating World, seven out of 10 countries.
