

30kWh Energy Storage Tank for San Jose Wastewater Treatment Plant

Overview

The projects represent the first use of alternative approaches to the delivery of public works improvements at the San Jose-Santa Clara Regional Wastewater Facility, the largest advanced wastewater treatment facility on the West Coast. It works 24/7 to clean Silicon Valley's wastewater to very high national standards, protecting public health and environment and supporting the economy. As a vital business and residential center, Silicon Valley requires a modern, state-of-the-art treatment plant to reliably clean its wastewater. The Facility is addressing this need through its Capital Improvement Program (CIP), rebuilding infrastructure worn from nonstop service since 1956, and. Situated in the heart of Silicon Valley, the SJWTP is a monument to human ingenuity and a testament to our responsibility towards environmental stewardship. To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an. Since 2014, the City of San José in California has been undertaking the largest public works program in its history: a \$2. Occupying over 2,600 acres at the southern edge of the San Francisco Bay, it serves more than 1.
