

# 5MW Discount for External Energy Storage Cabinets at Transmission Nodes

## Overview

---

NYSERDA's Bulk Storage Incentive program provides financial support for new energy storage systems over 5 megawatts (MW) of power measured in alternating current (AC) that provide wholesale market energy, ancillary services, and/or capacity services. Systems may be interconnected at the. The work in this presentation was funded by the U. Department of Energy, through the Water Power Technologies Office's HydroWIRES Program under the direction of Dr. The Reservoir solution combines GE's advanced technologies and expertise in plant controls, power electronics, battery management systems and electrical balance of plant - all backed by GE's performance. The loss of a generator or transmission asset may result in the loss of service to customers; transmission planners may also intentionally cut service to customers in extreme circumstances to balance the grid. In these events, energy storage can be used to maintain service to customers that would. Utility ABC is expecting high, medium, and low load growth with 25%, 50%, and 25% probabilities across two-time int r certainty over future load growth and will only construct an additional transmission line in sc at nodes D-L is found by multiplying the two probabilities for 5%+12. Whether for utility-scale projects, industrial applications, or.

## 5MW Discount for External Energy Storage Cabinets at Transmission

---

### Energy Storage as a Transmission Asset

Our forthcoming paper, "Energy Storage as a Transmission Asset: Definitions and Use Cases," provides clarity on this topic by defining the ways that energy storage can interact with the transmission ...
