

# 66kW photovoltaic panel price

## Overview

---

According to the National Renewable Energy Laboratory's Spring 2025 Solar Industry Update, residential solar costs average around \$2. Factors affecting cost per watt include: Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market. Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. Our estimator shows how many solar panels your home needs We generate an online cost and savings estimate You choose how many solar companies send you an exact price by email or text Click on your state for solar panels cost localized to your city or use the solar calculator above to see the live. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. Combined with the tax credit, homeowners can achieve payback periods of just 6-10 years.
