10 years
warranty

Overview

These are waterproof, scratch-resistant, and UV resistant, and they use 12 high efficiency monocrystalline SunPower cells with 22+% efficiency (praise the sun!). Each cell has a nominal voltage of 0.5V so we call this a "6V" panel. The 6V Solar Panel is a compact and efficient device designed to convert sunlight into electrical energy. It provides a stable 6-volt output, making it ideal for powering small electronic devices, charging batteries, or serving as a renewable energy source for low-power applications. Its. These panels come to us from Voltaic Systems, makers of fine solar-powered bags and packs. Note: specifications above are tested on standard condition: 1000W/m² radiation intensity, 25°C, AM1.
