

Albania s polycrystalline solar panel power generation

Overview

Albania generated nearly 490,000 megawatt-hours of electricity from solar power in 2024, reaching a record high as the country ramps up its investment in renewables. Photovoltaic capacity hit 449 megawatts, a notable jump from previous years. This achievement marks a major step forward in the country's efforts to diversify its energy mix, enhance energy security, and position. The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. The country hosts Karavasta, the region's largest photovoltaic.
