

Albanian solar power generation system

Overview

Five utility-scale solar photovoltaic parks with a combined installed capacity of 156 MW were commissioned in Albania in 2025. The largest of these, Sunny Side Solar (100 MW), was developed by the domestic conglomerate Kastrati Group, which has a diversified portfolio spanning. Albania is making significant strides in renewable energy, particularly through solar power projects. Here's a closer look at some of the major solar panel projects and developments in the country as of 2025. In April 2025, Albania's Ministry of Energy and Infrastructure unveiled plans to construct. EUKI is a project financing instrument by the German Federal Ministry for Economic Affairs and Climate Action (BMWK). The country hosts Karavasta, the region's largest photovoltaic.
