

Aluminum alloy horizontal water tank for photovoltaic panels

Overview

Photovoltaic water tank is a horizontal tank made of zinc aluminum magnesium alloy with a waterproof design and edge wrapping to improve durability and protection. Solar Panels Plus offers a wide range of solar tanks for all types of applications. These solar storage tanks are available in pressurized, non-pressurized (atmospheric), and. Hot Water Storage Tanks, Vertical tanks: 125 - 3000 gallons, Horizontal tanks (custom): 250 - 3000 gallons Standard storage tanks are available for sidearm or supplemental storage for traditional water heating systems. Specially designed tanks are now available for connection to high-temperature. AET offers solar hot water storage tanks and heating reservoirs for use in both direct open-loop and indirect closed-loop solar water heating applications. It works with vacuum tube/flat plate collectors (95% heat absorption) to store hot water efficiently, ensuring 24/7 supply.
