

# Aluminum-magnesium-zinc-plated photovoltaic bracket equipment

## Overview

---

The answer lies in an unassuming but revolutionary material combination – Zinc magnesium aluminum photovoltaic brackets. This is why professionals rely on ZM Ecoprotect<sup>®</sup> Solar: Our high-quality zinc-aluminum-magnesium-coated steels for effectively protecting high-performance stud framing from corrosion. It is mainly used for surface anti-corrosion treatment of steel and steel products. It is an alloy metal with excellent comprehensive performance. Zinc-aluminum-magnesium photovoltaic racking has the following. The Electricity Load Is Stable, And The Electricity Load Curve Matches The PV Output Characteristics, So That Self-generation And Self-consumption Can Be Achieved. GQ-D Series Distributed System Description: Distributed photovoltaic supports are divided into household photovoltaic supports and. Our self-developed independent single-row tracking bracket 1P system can adapt to 20% slopes on north and south slopes, remains close to the ground, and has strong wind resistance. The standard product can install up to 90 components, and the number of installed components can be adjusted according. The utility model relates to the technical field of solar brackets and discloses a photovoltaic solar zinc-aluminum-magnesium plated bracket, which comprises a rectangular base, wherein two front side support rods and two rear side support rods are symmetrically and fixedly connected to the upper.

## Aluminum-magnesium-zinc-plated photovoltaic bracket equipment

---

### Newest Trend Zinc-Aluminum-Magnesium (ZAM) Steel For Solar PV ...

The company focuses on the development and production of high-quality PV brackets, and applies Aluminum-Magnesium-Zinc plating with the best corrosion resistance to solar power ...
