

American standard h-shaped steel photovoltaic panel manufacturer

Overview

Origami Solar is the developer of a patent-pending steel solar panel frame that is transforming the solar industry through high-speed domestic production, reduced material and manufacturing cost, and dramatically lower greenhouse gas emissions. Solar energy is a great way to cut down on power costs, upgrade your home, and reduce your overall carbon footprint. Additionally, tariffs on foreign-made solar products helped level the playing field, making American-made. Origami Solar is the only developer of domestically-produced, steel solar module frames. According to the US Department of Energy, in Q1 of 2025, the US installed a capacity of 10. This data is collected by Solar Power World editors and will be continually updated as facilities.
