

# Andorra lithium battery energy storage project construction

## Overview

---

The construction of lithium battery energy storage systems in Andorra is being advanced by Endesa, which has provisionally won connection rights to build renewable energy resources and battery storage with a capacity of up to 1,200MW. The renewable development proposed by Endesa for Andorra does not only involve the construction of new wind and solar capacity, but also the hybridisation of these. Spanish and Portuguese utility Endesa, part of Enel, has provisionally won 953MW of connection. Andorra, a small but ambitious nation nestled in the Pyrenees, is rapidly emerging as a testbed for energy storage solutions that balance mountainous terrain with renewable energy goals. EDP Renováveis (Euronext: EDPR), a leading global wind and solar producer, will.
