

Anti-seismic photovoltaic bracket in stock

Overview

Our Anti-Seismic Photovoltaic Bracket Equipment utilizes high-quality cold-rolled steel coils and hot-dip galvanized strip, using a precision roll-forming process to provide construction projects with seismic support products that meet national standards. This product is designed to have high strength, corrosion resistance and ease of installation. It is suitable for various ground-based photovoltaic power stations, rooftop distributed photovoltaic systems and tracking support systems. Using high-quality materials and precise manufacturing. Our registered address is located at 599 Ganfu Road, Xihu District, Nanchang City, Jiangxi Province, China. Whether a stationary fastener or a part with free-moving components, our cross-industry professional designers are able to bring you new methods. FASTscrew can produce the right parts to simplify your process.
