Base stations and networks

Base Stations Enable Mobile Communications
Antennas Are Placed in Various Locations
More Mobile Devices Means More Base Stations
Base Station Output Power Is Low
Exposure Limits Are Set by Independent Organizations
Exposure Levels Are Much Lower Than The Limits
Public Access Is Restricted Where Needed
No Adverse Health Effects According to The Who
Independent expert organizations have established exposure limits for

radio waves based on many years of research. These limits include large safety margins. The World Health Organization (WHO), among others, recommends exposure limits which are adopted by national authorities. See more on ericsson purcellsysteMS [PDF]
