

Are photovoltaic panel collectors worth the money

Overview

With rising electricity prices and better technology, many homeowners are asking: Is solar a smart investment?

The short answer is “maybe. Most people break even in 6 to 12. For starters, they're a budget-friendly way to embrace solar energy without the hefty price tag of new panels. They might not be the latest model, but they can still provide significant savings and environmental benefits. In other words, you can recoup the money. Used solar panels are usually much less expensive than new ones but will likely not be up to the same standards. The pros of using solar panels include a lower carbon footprint, lower electric bills, potentially higher home value and tax credits.
