

Are photovoltaic panels harmful to the home

Overview

Are solar panels dangerous?

The short answer is that a properly installed and certified solar panel system is incredibly safe, offering more health benefits than risks. The potential health and safety concerns often stem from misinformation. When looking for a house to live in, recently, I noticed that those with solar panels made me VERY ill, within seconds. As I own a rf (radio-frequency radiation) meter (a Cornet 88T Plus), I began measuring these sorts of homes. What I found was a significant increase in rf radiation (from hundreds. Solar panels convert sunlight directly into electricity, involving components that warrant a factual examination of associated risks. These include: We must address these issues to use solar technology safely and responsibly.
