

Are there photovoltaic communication battery cabinets in the Czech Republic

Overview

In early 2025, the Czech Parliament approved new legislation enabling stand-alone battery storage systems to be connected directly to the grid – something that was not previously allowed. This regulatory shift paves the way for wider deployment of battery solutions and aligns the Czech market more. KATEMO GROUP is behind the construction of the largest energy park in the Czech Republic – KATEMO PARK Modlany with a final capacity of 130 MWh. We cooperate with CATL and CNTE. We are developing our own control system K-EMS. We design and install reliable energy solutions without power limits –. In November 2017, as the first battery storage operator in the Czech Republic, we launched an entirely new battery energy storage system (BESS - Battery Energy Storage System) for the accumulation of surplus energy from distribution systems and any power sources such as photovoltaic power plants or. However, the recent energy crisis, together with pressure from stakeholders and regulatory bodies to decarbonise, has triggered an unprecedented shift in the country's energy market. Between 2019 and 2020, coal production decreased by 24%. We proudly serve a global community of customers, with a strong presence in over 20 countries worldwide—including but not.

Are there photovoltaic communication battery cabinets in the Czech

 **TAX FREE**    

Product Model
 HU-ESS-215A(100KW/215KWh)
 HU-ESS-115A(50KW/115KWh)

Dimensions
 1600*1280*2200mm
 1600*1200*2000mm

Rated Battery Capacity
 215KWH/115KWH

Battery Cooling Method
 Air Cooled/Liquid Cooled

Energy Storage in the Booming Czech Market

In the Czech Republic, we are currently implementing a 1MW/ 2MWh project for Hennlich, among many others. Previously, we helped the country's leading wood processing plant to reduce their energy ...
