

Argentina Energy Storage Container Framework

Overview

Designed specifically for the Buenos Aires Metropolitan Area (AMBA), this initiative introduces an innovative, bankable contract model that guarantees long-term revenue for storage assets. Argentina has taken a decisive step toward solving its longstanding grid reliability crisis with the groundbreaking AlmaGBA energy storage initiative. Oversubscribed in its first tender, the program awarded 667 MW of battery storage capacity—surpassing its initial 500 MW target—representing a total. The Argentinian Ministry of Energy has launched the “AlmaGBA” Battery Energy Storage System (BESS) tender, aiming to deploy 500MW (4-hour duration, totaling 2GWh) to address electricity shortages in the Buenos Aires Metropolitan Area (AMBA). While keeping its well-known acronym, the organisation will amend its statutes to adopt the name Argentine Renewable Energy and. Will SINAW host a 300 MW solar PV project in Q2 2028?

Sinaw in Al Sharqiyah North Governorate is tipped to host a 250 - 300 MW solar PV project worth around \$200 - 250 million in investment and slated to be operational in Q2 2028.
