

Argentina Telecom Off-Grid Energy Storage Power Station

Overview

Aimed at enhancing grid reliability in the metropolitan area of Buenos Aires (AMBA), this \$500 million initiative marks one of the country's most significant moves toward integrating large-scale energy storage into its electricity market. The first large-scale battery energy storage tender in Argentina is catching the attention of the international community as an unequivocal step towards modernizing power infrastructure. At the beginning of the 1990s, the national government called different tendering processes for. Argentina's first energy storage tender drew 1.347 GW of bids from 15 companies proposing 27 projects, exceeding the 500 MW target and representing more than \$1 billion in pledged investment.
