

Australian photovoltaic bracket standards

Overview

Standards Australia has published a revision to AS/NZS 5033:2021, Installation and safety requirements for photovoltaic (PV) arrays. In the past twenty years, over 3. This advice alone does not constitute a fully definitive set of rules and should be read in. This blog explains the hierarchy of national standards, state regulations, DNSP rules and SAA guidelines and what that means for everyone buying, using and especially working with solar energy. Learn how recent updates impact project timelines and ROI. As the solar energy industry continues to grow, this is very important.

Australian photovoltaic bracket standards

ADVICE ON AS/NZS 5033

Licensed electricians working on PV and battery systems should have access to the following standards when reading this document. This advice is designed to be read in conjunction with the documents ...
