

# Automatic Ordering System for Folding Containers Used at Airports

## Overview

---

Our AI-powered automation system allows for seamless loading and unloading of cargo without traditional containers. This not only accelerates turnaround times but also significantly reduces operational costs for airport operators. Pallet and Container handling system of AAT includes four Elevating Transfer Vehicles (45 m height). We make sure your cargo business is profitable. Join us as we transform airport logistics and redefine cargo. AVILOAD is the ideal solution for transporting Unit Load Devices (ULDs) and containers of various types, including AKC, AKE, AKH, and DPE. Optimal Cargo & Baggage Handling Solution Prioritizing Injury Prevention, Reducing Cost and Time Robson Handling Technology are pleased to be Collaborators, delivery. We design and develop integral baggage handling systems backed by extensive industry experience and a wide range of modular products and solutions that meet the functional needs of any airport. Whilst this task is still predominantly performed by men in most airports around the world, ABLE was the first automated system to replace humans with robots at Amsterdam.
