Average electric bill for 4 bedroom house

Overview

For most four-bedroom homes, you could expect to see average monthly electricity costs ranging from $150 to $300, but this can fluctuate based on personal usage and environmental factors. Living in a larger home generally means having more space to heat and cool, which increases. The average electricity bill in the United States is $152. That's based on data collected by the Energy Information Administration, updated annually. The typical monthly consumption is 855 kWh, with an average price of 17. 78¢ per kilowatt (November 2025 data). To calculate the average electricity bill for 4 person household, we will need to look at all the 4-person. To find out which US states pay the most for utilities, we researched energy bills, natural gas costs, water and sewer bills, internet and phone costs, and more to find out each state's average utility bill. No guesswork, no math—just a quick, clear estimate based on your home and usage. Enter Your ZIP Code: Start by entering your ZIP code. If we have rates from the local electricity market, we will.
