

# Belgium backup power

## Overview

---

Natural gas accounted for 18.8%, while other fossil sources such as oil contributed 3. Explore Belgium's 2024 electricity mix, showing how nuclear power remains central while renewables like wind and solar continue to grow alongside fossil fuels. Engie and Sungrow have commissioned the first 400 MWh phase of mainland Europe's largest battery energy storage system in Vilvoorde, Belgium, with full capacity due by end-2025. Energy company Engie, alongside battery energy storage system (BESS) provider Sungrow, announced this week the successful. As a key European industrial manufacturing hub, Belgium has benefited from energy transition and electrification in recent years, leading to a continuous increase in factory electricity demand. Events since Russia's invasion of Ukraine in February 2024.

### Energy in Belgium

Overview  
 Primary energy consumption  
 Electricity  
 Energy types  
 Final energy consumption  
 Greenhouse gas emissions  
 Business

Energy in Belgium describes energy and electricity production, consumption and import in Belgium. It is governed by the energy policy of Belgium, which is divided between several levels of government. For example, regional governments are responsible for awarding green certificates (except for offshore wind parks) while the national government is responsi...
