

Bentley s largest solar farm

Overview

Over 20,000 solar panels have been fixed to the roof of Bentley's factory in Crewe, making use of 3. It is anticipated that at peak generation times, the system will produce up to 40% of Bentley's energy requirements and reduce CO2 usage by over 2,500. (Crewe, 22 June) Installation started today at the Bentley Motors carbon neutral 'dream factory' in Crewe to increase the number of on-site solar panels to 36,418. The announcement coincides with the 10th anniversary of the first solar panels at the Pym's Lane site, where all Bentley models are. Other names: Bentley Motors (Phase 2), Bentley Motors Ltd 1 (Phase 1) Bentley Motors solar farm is an operating solar photovoltaic (PV) farm in Cheshire, North West, England, United Kingdom. Read more about Solar capacity ratings. more Audio tracks for some. The marque transformed its aging production facility in Crewe, U., into an environmentalist's nirvana, an undertaking that took two decades and millions of dollars. The 80-year-old facility does not resemble a traditional automotive plant.

Bentley s largest solar farm

Tomorrow and Beyond

In 2024, for example, Bentley Singapore installed over 1,200 solar panels to power its showroom. Unused solar energy is exported back to the grid, ensuring zero-carbon electricity consumption.
