

Black battery energy storage system price

Overview

Cost range overview: Installed BESS for residential-scale systems typically falls in the \$7,000-\$30,000 band, with per-kilowatt-hour prices commonly around \$1,000-\$1,500 depending on chemistry and vendor. Home and business buyers typically pay a wide range for Battery Energy Storage Systems (BESS), driven by capacity, inverter options, installation complexity, and local permitting. This guide presents cost and price ranges in USD to help plan a budget and compare quotes. In 2025, the global average price of a turnkey battery energy storage system (BESS) is US\$117/kWh, according to the Energy Storage Systems Cost Survey 2025. This battery storage update includes summary data and visualizations on the capacity of large-scale battery storage systems by region and ownership type, battery storage co-located systems, applications served by battery storage, battery storage installation costs, and small-scale battery storage. As of 2024, various factors contribute to the overall cost structure of BESS, including the price of battery cells, power electronics, installation, and operation and maintenance expenses.
