

# BpSolar power generation

## Overview

---

Lightsource bp is one of the world's leading developers and operators of utility-scale solar assets. In the US, Lightsource bp has developed more than 30 solar projects with over 4 gigawatts of generation capacity combined – enough to power more than 600,000 homes each year. Our company now fully. We're an integrated energy company with global scale, ambitious plans and a team of brilliant people delivering energy to the world, today and tomorrow. Whether you're just starting out or ready for your next big move, you're in the right place to explore an exciting career with bp bp's Energy. bp mostly produces, trades and sells oil and gas, alongside transition activities such as EV charging, bioenergy and renewables, that are a much smaller but key part of our business. We are investing in renewables in a capital-light way with an intense focus on competitive returns, maximizing. BP Solar was a manufacturer and installer of photovoltaic solar cells headquartered in Madrid, Spain, with production facilities in Frederick, MD, India and China. [1][2] It was a subsidiary of BP. In 1981, BP acquired initially 50% of Lucas Energy Systems which became Lucas BP Solar Systems. A key part of BP's Alternative Energy business, BP Solar was a global company with over 2200 employees focused on harnessing the sun's energy to produce solar power for. The deal will grow BP's renewable energy pipeline to 23GW (Credit: RenataP/Shutterstock) BP will invest \$220m to acquire nine gigawatts (GW) of solar power projects in the US from developer 7X Energy, as it continues to diversify its energy portfolio towards a greater share of renewable capacity.
