

Bulgarian mobile energy storage container automated type for field operations

Overview

Bulgaria-based storage manufacturer IPS has released a new utility-scale BESS with a rated capacity of 8.1 MWh and an integrated 4 MW inverter. The X-BESS 8 system is housed in a 20-foot container footprint equivalent and features liquid cooling. From here, a sharp veer onto a narrow dirt track suddenly brings the 11 MW Malko Tarnovo solar park into view. Built in 2021, the project is one of two developed by the family-owned company Trakia MT. 2 MW energy capacity, the ZBC 1000-1200 is designed with an improved LFP battery management system and trusted Lithium-Ion Phosphate battery technology for a long operating life. In partnership with leading Bulgarian solar. capacity to 2. In other words, Bulgaria could easily sail past its 2030 National Ener ables with variable output, such as wind and solar, is however no simple task. The transition will require integral planning around electricity. A Battery Energy Storage System (BESS) allows businesses to store excess renewable energy and release it when needed.
