

Burundi substation energy storage project starts

Overview

This project - funded by the Bank and the Burundian government, at a total cost of USD 26 million - will connect 25,000 households in the beneficiary towns and villages. The first connections for new customers are scheduled for the first quarter of 2025. Burundi's largest electricity substation, co-financed by the African Development Bank Group, will increase national electricity access by seven percent. The substation will strengthen the reliability and stability of the electricity network in Bujumbura, the country's economic capital Burundi's. A high-level delegation from the Burundian government and the African Development Bank visited the Rubirizi substation site on 9 August 2024. Bujumbura, Burundi, — The largest electricity substation in Burundi, located in Rubirizi, is set to significantly enhance the country's electricity access.
