

Can archives use rooftop photovoltaic panels

Overview

Solar panels installed on a historic property in a location that cannot be seen from the ground will generally meet the Secretary of the Interior's Standards for Rehabilitation. But. The National Park Service (NPS. gov) provides guidance on incorporating solar panels into historic buildings and landscapes, emphasizing preservation of the site's character. Key considerations include minimizing visibility from public view, ensuring reversibility, and avoiding damage to historic. Solar can be installed on a property listed on the National Register of Historic Places. The national Historic Preservation Act of 1966 created the National Register. 09 by Kimberly Kooles, NAPC support staf and revised by Caty Rushing in 2011. They are intended to serve as a starting point for lo stem which uses one or more solar panels to convert sunlight into electricity. But that doesn't mean they're.
