

# Can photovoltaic panels be installed in the EU

## Overview

---

Members of European Parliament (MEPs) have adopted the EU Solar Standard, which will require the installation of solar on buildings across EU member states. The EU had around 338 GW solar PV installed in 2024, but a big effort is still needed to reach the set target (source: SolarPower Europe). The rule will apply to buildings for which the application. Solar panels imported or manufactured in the European Union are subject to various regulations, directives and standards. In addition, solar panels must be correctly labelled, documented, and tested. This update seeks to assess the impact of significant policy and regulatory changes in the EU.

## Can photovoltaic panels be installed in the EU

- LiFePO<sub>4</sub>**
- Wide temp: -20°C to 55°C**
- Easy to expand**
- Floor mount&wall mount**
- Intelligent BMS**
- Cycle Life:≥6000**
- Warranty :10 years**

### The European Parliament has decided on mandatory solar ...

In March 2024, legislation requiring EU Member States to install solar PV systems in new and renovated buildings moved a step closer to being implemented, with the approval of the European Parliament.
