

Can solar inverters be placed indoors

Overview

While the grid-tied inverters are tailored for outdoor use, you can install them indoors as well. However, when choosing the optimal location, considerations should include protection, ease of maintenance, and local. Can the inverter and battery be installed indoors?

I have a PV system with 12 panels, SE inverter and a 16kWh LG battery. The system is currently installed in my attic, that is not insulated and therefore can be thought of as outdoors but covered from the rain. Indoor placement (recommended): Cooler, dry and stable temperature (e. garage, basement or technical room). Less exposure to weather conditions such as rain and UV radiation.

Can solar inverters be placed indoors

Where to Place Solar Inverter?

You can place your inverters indoors or outdoors according to your requirements, but a shaded, dark spot away from moisture and direct sunlight is always recommended.
