## Overview

---

This guide will familiarize you with the features and installation of a second Energy Management System (EMS) as a retrofit into a G Series cabinet to form a dual EMS configuration. Versatile installation features: Our enclosures have two universal wall and pole mounting brackets and an adjustable and removable back plate. This construction allows for smooth installation on various surfaces and integration of equipment inside or outside without drilling additional holes. Remote diagnosis, performance tracking, and fault alerts through intelligent BMS. The solution is a hybrid approach that minimises the use of diesel generators, used only in case of emergency, while maximizes the use of solar power and batteries, boosting the performance stability and financial return required to op frastructure to go down.
