

# Can you make photovoltaic panels yourself Zhihu

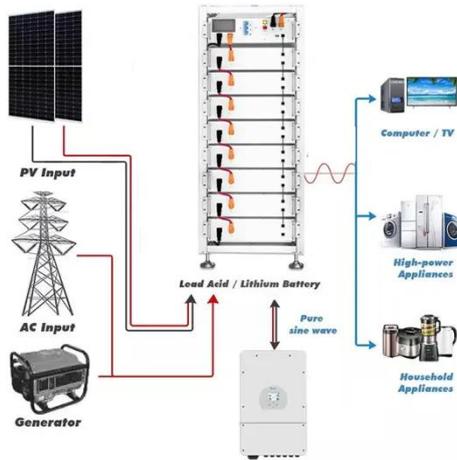

## Overview

---

The answer is yes—but don't grab your soldering iron and solar cells just yet. This guide explains whether you should make your own solar panel, what's involved, how much it costs, and when it's smarter to buy a factory-made module. Do-it-yourself (DIY) solar panels have become increasingly popular, but installing them is a complex project that requires knowledge and skill. In fact, we surveyed 1,000 homeowners and found that less than 0.3% chose to install their panels themselves. You place a bulky panel in the sun and electricity is created from thin air, ready to power anything. Whether you completely power your home with solar energy or are just interested in using a few solar panels here and there, you can use these DIY solar panel tutorials to help you out. These solar panel tutorials are made with an array of materials and for a variety of purposes, ensuring that.
