

# Canadian solar Module Production Project

## Overview

---

Canadian Solar has announced the construction of a 5 GW solar PV cell production facility in Jeffersonville, Indiana. Located at the River Ridge commerce centre, the state-of-the-art plant will produce approximately 20,000 high-power modules each day. Mesquite solar production facility in Texas by developer Canadian Solar is a key facility in North America's renewable manufacturing landscape, serving as an assembly and production campus for high-efficiency solar modules. The developer Canadian Solar benefits from U. logistics advantages and. SAN DIEGO and GUELPH, Ontario, - Canadian Solar Inc. (NASDAQ: CSIQ) and EDF Renewables North America today announced the signing of a multi-year module supply agreement to deliver up to 7-gigawatts (GW) of high efficiency N-type TOPCon solar modules to be produced at Canadian Solar's. Lead proponent: Canadian Solar Solutions Inc. Location: Guelph, Ontario EIP contribution: \$ 7. 7 M VIEW VIDEO Project Background Canadian Solar's High-Density Module (HiDM) project's overall objective was to deliver an innovative technology to the domestic and global. Canadian Solar Inc. (NASDAQ: CSIQ), one of the world's largest solar technology companies, has taken a major step forward in sustainable solar manufacturing.
