

# Chile california solar energy

## Overview

---

The Building Energy Efficiency Standards (Energy Code) include requirements for solar photovoltaic (PV) systems, solar-ready design, battery energy storage systems (BESS), and BESS-ready infrastructure. A solar PV system is prescriptively required for all newly constructed. Solar power in Chile is an increasingly important source of energy. [1] In 2024, Solar energy provided 19.6 gigawatt hours (GWh) of energy. Chile is developing two types of solar technology: solar photovoltaic (PV) panels and solar. Santiago, January 10th – Chile achieved a new milestone in December 2024 by generating a record 42% of its electricity from wind and solar, according to global energy think tank Ember. With a target to achieve 100% renewable energy by 2050, the Chilean market has attracted a diverse array of international and local solar companies.
