

China Merchants New Energy Storage

Overview

China's new energy storage capacity has exceeded 100 million kilowatts, marking a major milestone in the nation's transition toward a new-type energy system and consolidating its global lead in renewable energy development, said officials at an energy storage sub-forum on Nov 5. China's National Energy Administration (NEA) has released the China New Energy Storage Development Report 2025, marking the first official and comprehensive government report dedicated to the country's rapidly advancing new energy storage (NES) sector. The report, jointly prepared by the NEA's. Inside the Huadian energy storage plant in China's north-central city of Delingha, Qinghai province. 7GW, representing an 85% year-on-year rise. "These facilities are designed to work with photovoltaic power generation.
