

China high voltage switchgear in Senegal

Overview

In 2025, CHINT played a key role in the construction of the Boucle de Ferlo 225kV High-Voltage Transmission Grid Project in Senegal, contributing critical power equipment to strengthen grid interconnection and improve electricity supply reliability in the country's northern regions. Commissioned by the Senegalese government, the project is investing more than FCFA 220 billion to modernise the country's electricity transmission network through the commissioning of several strategic infrastructures operated by the National Electricity Company of Senegal (Senelec), under the Senegal Power Compact. CHINT Group is named a Top Employer China 2026, recognizing its excellence in HR digitalization, talent development, employee well-being. CHINT High-Voltage Switchgear Manufacturing workshop established in 2003. Chint can provide GIS products from 66kV to 550kV, with an annual production capacity of 2000 bays for products with 145kV and below, and 1000 bays for products with 220kV and above. The infrastructure forms part of the Senegal Power Compact, a program financed by the Millennium Challenge Corporation, with a total of 1.5 billion USD. Do you also provide customisation in the market study?

Yes, we provide customisation as per your requirements. To learn more, feel free to contact us on sales@6wresearch.com. Any Query?
