

# China s new solar energy on-site

## Overview

---

China installed a record 315 GW (AC) of new solar capacity in 2025, lifting cumulative installed PV capacity to 1.2 TW and pushing non-fossil power sources past thermal generation for the first time. 3 terawatts by the end of 2026 as China expects 300 GW to come from primarily wind and solar. China's National Energy Administration (NEA) released its 2025 power sector statistics on Jan.
