

Construction status of wind-solar hybrid power plant in Malta

Overview

The project, which will be awarded via a Competitive Dialogue Process, will involve the design, construction, operation, and eventual decommissioning of a wind farm located beyond Malta's territorial waters, within an area to be declared as part of the country's Exclusive. The project, which will be awarded via a Competitive Dialogue Process, will involve the design, construction, operation, and eventual decommissioning of a wind farm located beyond Malta's territorial waters, within an area to be declared as part of the country's Exclusive. As the submission phase for the Preliminary Qualification Questionnaire (PQQ) related to Malta's first offshore wind farm concession has concluded, submissions were presented. The PQQ, which was launched in December of last year, marks a significant step in the development of this pioneering. VALLETTA (ITALPRESS/MNA) - The Maltese government has identified two suitable sites for wind farms from the initial six in Malta's Exclusive Economic Zone. However, it did not say where the shortlisted sites are located due to further on-site studies are needed to reduce technical risks and. At present, there are five main sources of electricity generation in Malta: a 60 MW temporary diesel-fuelled power plant.
