

Container energy storage power supply equipment

Overview

A Containerized Energy Storage System (ESS) is a modular, transportable energy solution that integrates lithium battery packs, BMS, PCS, EMS, HVAC, fire protection, and remote monitoring systems within a standard 10ft, 20ft, or 40ft ISO container. Atlas Copco has developed a 10 ft and 20 ft container as an Energy Storage System, designed to meet the requirements of both off and on grid applications. Ideal for use in renewable power plants. Designed to house advanced battery technologies within robust, transportable. These innovative solutions offer a turnkey approach to energy management, making them indispensable for utilities, businesses, and renewable energy projects worldwide.
