

DC power storage container for subway stations

Overview

Our containerized energy storage system combines modular battery storage with integrated power conversion. This mobile, all-in-one solution supports depots, testing facilities, and industrial sites requiring flexible, transportable, and reliable power supply. Data was collected periodically over 15 months from a train in. Traction power supply requires powerful, reliable, low-maintenance, compact substations. By integrating the equipment in a modular housing and undertaking rigorous testing off site. The WMATA (Washington Metropolitan Area Transit Authority) Metrorail System is the second busiest rapid transit system in the U.

DC power storage container for subway stations

Subway Energy Usage and Analysis of Energy Storage System ...

A typical scenario involves using energy storage, during a partial or complete traction power outage to enable trains to travel to the next station where passengers can safely disembark.

WMATA Energy Storage Demonstration Project, Final Report

The trains are powered by more than 100 traction-power substations across the network through a third-rail 700 V dc distribution system. This system consumes about 500,000 MWh per year, at a cost of ...

 The three-phase AC supply is fed in and distributed via the medium-voltage switchgear. The rectifier transformer unit (rectifier transformer and rectifier Sitras REC) transforms the voltage and frequency of the power supply. DC switchgear Sitras DSG or Sitras CSG distributes the power to the track sections. The Sitras SCS station control system

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled
