

# Dili aluminum acid solar battery cabinet life

## Overview

---

On average, a well - maintained lead - acid battery in a solar battery cabinet can last between 3 to 5 years. Factors such as depth of discharge (DOD), temperature, and charging regime significantly affect their lifespan. They're commonly used in both home and off-grid systems. LFP chemistry dominates for longevity:. KDM solar battery cabinets provide you with the ultimate outdoor dust-tight, watertight, and weatherproof solution for your solar batteries. These cabinets not only have special gaskets against dust and liquids but also locking mechanisms to secure your enclosure against unauthorized access. Each has unique advantages, costs, and lifespan considerations.
