In accordance with the IA, GPC, at Generator's cost, will own and install "Interconnection Facilities" for the project, so long as Generator complies with IA terms and conditions, including the requirements outlined in these Guidelines. All obligations of Generator as described in these Guidelines. Interconnection standards define how a distributed generation system, such as solar photovoltaics (PVs), can connect to the grid. Whether you're a DIY enthusiast, professional designer, or seasoned contractor, a clear and detailed wiring diagram can be the difference between a successful project and one bogged down by delays.
