

# **Do I need to discharge the battery when moving the battery cabinet How should I discharge it**

## Overview

---

For storage, you do not need to fully discharge the battery. This process lowers the chance of fire during transport. It's important to note that the end-of-life of a lithium-ion battery occurs when it can no longer perform as required. Lithium-ion batteries start aging from the. Summary: Manual says remove the battery after charging. When the battery pack is fully charged, the green LED will stop flashing and will shine green continuously. Moreover, they usually have an automatic stop. This article explains how to discharge a battery safely, covering battery types, procedures, cutoff voltages, and safety tips to maintain performance, longevity, and reliability.

## Do I need to discharge the battery when moving the battery cabinet?

---

### BU-501: Basics about Discharging

A discharge/charge cycle is commonly understood as the full discharge of a charged battery with subsequent recharge, but this is not always the case. Batteries are seldom fully ...
