

Do inverters and batteries have a lifetime warranty

Overview

Lithium batteries usually last 10–15 years, while inverters tend to need replacing after 10–12 years. Today, most home solar energy systems include three primary coverages: product warranties, performance guarantees, and installation warranties. Product warranties A solar product warranty covers the physical components of your system, such as the panels, inverters, or batteries. Labor and shipping expenses are generally not included in solar inverter warranties, but. The warranty period for power inverters can vary significantly based on the brand, model, and type of inverter, reflecting the manufacturer's confidence in their product's reliability and longevity. Warranties vary by product and brand, but most panels come with 25-year performance warranties.
