

# Do solar photovoltaic panels really make money

## Overview

---

Here's the truth: For most homeowners, solar panels are absolutely worth it. The average solar shopper saves between \$37,000 and \$154,000 over 25 years—not including any potential incentives—transforming what feels like a significant upfront cost into substantial long-term. Solar panels are an upfront investment that can save homeowners a significant amount of money in energy costs over the life span of the panels. With electricity. Homeowners who install solar power systems can receive many benefits: reduced electric bills, lower carbon footprints, and potentially higher home values. However, these benefits can come with significant installation and maintenance costs and gains can vary from one house to another. " If you pay cash, the average system costs \$13,962 to \$27,924 before any government help or incentives. Most people break even in 6 to 12 years.
