

Do you dare to step on the photovoltaic panels

Overview

It's not recommended to walk on solar panels. They are fragile and can crack or get damaged, reducing their efficiency. Walking on solar panels is generally not recommended due to the potential for damage. This may occur if you are installing equipment on your roof where your panels are, if you are performing roofing work, or if you are cleaning your solar panels. Microcracks are tiny fractures that can form in solar cells from a range of causes, including poor production, rough handling, and everyday weather stresses like wind or snow. There are various reasons a person would need to walk on. Well, here's the thing - 78% of solar installers admit to occasionally walking on panels during rooftop installations. But here's the kicker: every major manufacturer explicitly prohibits this practice.

Do you dare to step on the photovoltaic panels

Can You Safely Walk on Solar Panels?

51.2V 150AH, 7.68KWH

Technically, you can step on a solar panel, but it's not recommended. Even the slightest foot pressure can create microcracks or damage that lowers efficiency and may shorten the panel's ...
