

# Dubai-style solar telecom integrated cabinet energy method

To Strive forward No Energy Waste

- ✓ All in one
- ✓ 100~215kWh High-capacity
- ✓ Intelligent Integration

## Overview

---

Solar Module integration enables 5G telecom cabinets to cut grid electricity costs by up to 30% through on-site renewable generation, hybrid energy management, and advanced storage. Operators experience lower operating expenses, less diesel use, and improved. Du also achieved a 25 percent reduction in office energy consumption made possible through the adoption of energy-efficient measures. A small group from the TelecomTalk community keeps this going. Support only if our work adds value for you. The following data. Integrates solar input, battery storage, and AC output in a compact single cabinet. Offers continuous power supply to communication base stations—even during outages. Remote diagnosis, performance tracking, and fault alerts through intelligent BMS.

- LiFePO<sub>4</sub>
- Wide temp: -20°C to 55°C
- Easy to expand
- Floor mount&wall mount
- Intelligent BMS
- Cycle Life:≥6000
- Warranty :10 years

### du implements cutting-edge 'Solar on Tower' sustainability solution in

Developed in-house and patented by du, the Solar on Tower solution has been implemented at 60 sites as of December 2023, with plans to extend it to 270 sites by the end of 2024.
